

Game plan

Monday 22nd June

Day 1 - Understand + Explore + Choose + Start

KICK OFF!
10am - 11:00am

Welcome and intros
Game plan of event and key milestones

Context setter
Team intros, team name
Frame your problem
How might we...
Challenge + personas

45 minute lunch break

1:30 - 3:30pm
Brainstorm ideas and agree on direction - research + sketch

3:45 - 5:30pm
Start bringing your idea to life

Tuesday 23rd June

Day 2 - Build + Refine + Tell the Story

RECAP
10am - 12:00pm

Recap day 2 agenda and key milestones
Build, test and improve

45 minute lunch break

1:30 - 2:30pm
Prepare your pitch

2:30 - 3:00pm
Submission window

3:00pm - 4:30pm
Team Pitches

4:30pm - 5:30pm
Judging and winner announcements

Judging criteria + milestones

Judging Criteria	1. Innovation (20%)	2. Feasibility (20%)	3. Impact (20%)	4. Presentation (20%)
1. Innovation	How novel is the idea? Does it solve a real problem? Is it a new approach to an old problem?	How feasible is the idea? Is it technically possible? Is it financially viable?	How impactful is the idea? Does it address a significant problem? Does it have the potential to change the world?	How well did the team present their idea? Was it clear, concise, and engaging?

PRIZES:
winners: \$800
second place: \$400

Some IAG brands - check out the websites (click top right corner of each image)

Responsible and ethical use of AI - some principles to guide you

1. Purposeful Use
Use AI to solve a real business problem - not just for a feature.
- Consider the business case, data privacy, security, and data quality.
- Improve customer experience and operational efficiency.

2. Responsible Handling
Treat data and AI outputs with care.
- Use AI responsibly and ethically.
- Ensure data quality and accuracy.
- Verify the results of AI outputs.

3. Bias-proofed Input
Think about the inputs, and consequences.
- Other people's data.
- Who owns the data?
- Avoid harm to customers, suppliers, or staff.

Sample customer journey + pain points

Customer Journey Map
The map depicts the complete customer journey from initial contact to final outcome.

Day 1

1. How Might We?

Step 1: Brainstorming ideas to solve the problem.
Step 2: Refining ideas into a clear problem statement.
Step 3: Identifying the problem statement.

2. Challenge + Persona

Step 1: Identifying the problem statement.
Step 2: Identifying the problem statement.
Step 3: Identifying the problem statement.

3. Research

Step 1: Researching the problem statement.
Step 2: Researching the problem statement.
Step 3: Researching the problem statement.

4. Opportunity canvas

Step 1: Identifying the problem statement.
Step 2: Identifying the problem statement.
Step 3: Identifying the problem statement.

5. Sketches & Voting

Step 1: Identifying the problem statement.
Step 2: Identifying the problem statement.
Step 3: Identifying the problem statement.

Day 2

1. User feedback

Step 1: Identifying the problem statement.
Step 2: Identifying the problem statement.
Step 3: Identifying the problem statement.

2. Testing

Step 1: Identifying the problem statement.
Step 2: Identifying the problem statement.
Step 3: Identifying the problem statement.

3. Prototype

Step 1: Identifying the problem statement.
Step 2: Identifying the problem statement.
Step 3: Identifying the problem statement.

4. Pitch help

Step 1: Identifying the problem statement.
Step 2: Identifying the problem statement.
Step 3: Identifying the problem statement.

Upload images of your prototype here, have you ever used Lovable, Marvel APP or justinmind to build a low fi prototype?

Hackathon focus

Here are some of the things we've heard
